1925 - m. 41

On road to main house just a
 century old a number of stone
 chimneys and one which is one
 column weathered. Not only ATTON old
 fields. Not thought from Derwanda
 2 1/2 hrs of road after rainwater

Yerand. 10 min before village, with
 roadbed a heap of stones with a small
 temple, though no column work and no
 inscription. Two walls of red earth on
 either side of the 4 walls. Search for
 largest Roman date. Epigraphical copy

Just how a problem has a sense.

Derwanda from a low ridge has hills
 between which the road runs. The northern
 is 150m long, the S. rather more. The
 hills is quite unfortified, and is covered
 with small trees, cultivated in large plots
 in places. The S. hill appears to have had
 a wall of red earth (very poor quality) and
 the eastern, cultivated in fragments. Alt.
 1075 m.

Derwanda. The city is not a top of
 the hill. Not a top S slope, like Buba
 and Sillone. Altitude 1360 m
